Periodicals

Indian Journal of Malariology
The Indian Journal of Malariology was started in 1947 by the Malaria Institute of India with an aim to disseminate scientific information to ongoing malaria control programmes and research. The journal was discontinued in 1963 due to inadequate interest and poor response from the scientific community. However, in the wake of widespread resurgence of malaria, research on malaria was started at many centres in the country. There was therefore a felt need of a journal exclusively on malariology. The Indian Journal of Malariology was revived by the Malaria Research Centre in 1981 after 17 years of its discontinuation with the following objectives: to disseminate the scientific information on malaria to provide support to the ongoing malaria control programme & research; to promote the interest in malaria research and to meet the growing demand for publication of journal exclusively devoted to basic, applied and operational research in the field of malariology. The journal which has entered its twenty first year of publication is devoted to original research communications on all aspects of malariology. The journal also publishes book reviews and letters to the editor, inviting frank scientific opinion on the papers published in the Indian Journal of Malariology. From 1981 to 1988, the Indian Journal of Malariology was published twice a year and from 1989 onwards it is being brought out every quarter.

Malaria Patrika (Hindi)
The results of scientific findings are usually published in English which do not reach to common man due to illiteracy and also lack of awareness and command on English language among the majority of the population of India. It has been realized that malaria control is everybody’s concern. In order to disseminate the basic knowledge about the components and conditions, spreading of malaria and recent scientific developments taking place in the field of malaria control, it was thought prudent by the Centre to publish Malaria Patrika in Hindi because Hindi is the National language of India. Therefore, Malaria Patrika was launched in 1993 with 4 issues in a year—March, June, September and December in order to disseminate the scientific information in the form of popular, non-technical with common vocabulary of language, so that common man can understand the intricacies of science of malaria. If necessary, technical words in English are used in Devnagiri script. In addition to scientific articles, national and international news on malaria and centre’s activities are also included to create awareness among the community. Publication of the patrika has been applauded by people from different walks of life—students, village leaders, NGOs, teachers, government departments, etc.

Books

Published by MRC
1. The Anophelines of India by T. Ramachandra Rao (Revised edition) published by Malaria Research Centre (ICMR), Delhi in 1984
4. Community Participation in Malaria Control edited by Dr. V.P. Sharma (1993)

Authored by MRC Scientists
2. Anopheline Species Complexes of Southeast Asia by Sarala K. Subbarao, published by World Health Organization, Regional Office for Southeast Asia Region, New Delhi in 1998 (Technical publication, SEARO No. 18)
Proceedings

Reprints
2. Malaria in Bombay 1928 (1990)

Manuals

Folders
5. Bioenvironmental Control of Malaria [Regional Language][Assamese] (1989)
15. Industrial Malaria Control– Bioenvironmental Approach (1992)
20. Major Vectors of Malaria in India (1996)
21. Quick Identification Key for Indian Anophelines (1996)
22. Biological Charts Folder (1996)
23. Biological Control of Mosquitoes for Prevention of Malaria (1996)

Brochures
1. Information on Indian Journal of Malariology (1986)
4. 7-Point Action Plan for Malaria Control in Madras City (1992)
7. Larvivorous Fishes in Mosquito Control [Illustrated] (1995)
8. Insecticide Impregnated Bednets (Revised) (1996)
9. 7-Point Action Plan for Malaria Control in Urban Areas (1996)
11. Biolarvicides (Bacillus thuringiensis var. israelensis Serotype H-14) (1996)
12. Malaria Diagnosis and Treatment [Illustrated] (1996)

Flyers
1. Malaria Ki Rokthaam: Aassan Tarike (Hindi) (1991)
2. Save Yourself from Malaria (2001)

Coloured Biological Charts
1. Life-Cycle of Plasmodium falciparum
2. Life-Cycle of Plasmodium vivax
3. Life-Cycle of Plasmodium malariae
4. Fever Periodicity in Malaria Infection
5. Differences between various Developmental Stages of Anopheles, Aedes and Culex Mosquitoes

Reports
1. Malaria Research Centre—Annual Reports (1977–2001)
3. In-depth Evaluation of the Community-based Integrated Vector Control of Malaria Project in Kheda, Gujarat — October 1987
5. 7-point Action Plan to Control Malaria in Madras — 1989
11. Final Report of Situational Analysis of Malaria in District Tumkur, Karnataka under Roll Back Malaria Initiative — 2001
15. Larvivorous Fishes for Mosquito Control [Gujarati] — 2002
